Wind Turbine & Solar Cables

Cameron Wire & Cable is the leading Wind and Solar industry resource for durable, high-performance cables, cable kits, custom hardware packages and cable assemblies. We work in partnership with our customers to help maximize productivity and profitability through innovative cable solutions and services.

Bulk Cable

Cables designed for durability in harsh, isolated operating environments.

In-stock and ready to ship:

- 600-2000V Low Voltage Power Cable*
- 5-35kV Medium Voltage Power Cable*
- WTTC (Wind Turbine Tray Cable) Control
- Type PV and TC Solar Cables

*Single and Multi-Conductor

345,000 sqft. Corporate Warehouse

Custom Kits

Cameron packages and stocks customized cable and hardware kits that match your specific application requirements:

- Lugs / Connectors / End Caps
- Pre-Cut Lengths
- Reduces Inventory and Order Processing Costs

Hardware

Compression & ferrule lugs, Ty-Raps, Kopr & Aluma shield, tape, heat shrink and other mission-critical parts.

Plug & Play Systems

Arrives ready for immediate installation. Eliminates the need for on-site termination expert or high-cost assembly inventory.

- Power, Control and Instrumentation Cables
- High-Quality, Long-Lasting Connector System

Custom Cables

Customer-directed service where cable is cut-to-length, prepped, packaged and made ready to ship.

*Cut to
specific lengths*

*Terminated, coiled
with end caps*

- Great customer service and engineering support
- Reliable on-time delivery
- Industry-best lead times
- Emergency service
